

Why microchip your pet?

*Microchipping creates a forever bond with your furry family members. We use **HomeAgain Microchips**. Coupled with the **HomeAgain Pet Recovery Network**, you'll give your pet the best chance of getting back home to you!*

A permanent listing of your pet's microchip ID and your contact info is added to HomeAgain's National Recovery Database

Almost all veterinary practices and shelters use scanners that can read the microchip codes, so your pet can be identified no matter where or how far away they are found.

Lost Pet Network and Alert System

As soon as a pet is reported lost, HomeAgain sends a lost pet alert with your pet's information and photo to members of the HomeAgain Pet Recovery Network within a 25 mile radius. This network includes over 1 million veterinary practices, shelters, and volunteer pet rescuers nationwide.

Travel Assistance for Found Pets

HomeAgain loves happy reunions and wants to ease the burden of expensive travel costs associated with reuniting pets with their families. Annual membership includes coverage up to \$500 in pet airfare if a pet is found over 500 miles away.

To learn more, visit public.homeagain.com, then call us to schedule your pet's microchip implantation appointment.
